HOME MAINTENANCE CARE PLAN

Brushing + Combing

Sort through your Hairdreams hair with your fingers from the roots to the ends on a daily basis. Making sure you set aside time every morning to reintegrate your natural hair through your hairpiece with your crochet hook.

Carefully brush your hair with the Hairdreams brush every day. Always hold on to the roots of your hair with one hand while brushing.

If your hair is permed, moisten it and knead it with your fingers after brushing.

Washing

All Hairdreams Special Shampoos were developed especially for the regular washing of human hair extensions. Different formulas are available to cater to any hair type.

Directions for use:

Thoroughly brush your hair with the Hairdreams brush before washing.

Rinse your hair and apply the shampoo from the roots to the ends. Do not rub the hair.

Rinse your hair thoroughly from top to bottom.

After washing, sort through your hair and bonding points with your fingers.

Conditioning

After washing, use the Hairdreams Regeneration deep conditioning treatment. The Regeneration deep conditioning treatment provides the hair with important nutrients, smoothes the surface of the hair and ensures maximum elasticity and strength.

Directions for use:

- Apply the Hairdreams Regeneration conditioning treatment and carefully press it into the hair from top to bottom. Do not rub the hair.
- Leave it in for about 5 minutes - for extra deep conditioning leave it in for up to 20 minutes.
- Rinse thoroughly.

Hair Care Products

Since your Custom Crown hair is not connected to your scalp, it cannot be provided with its natural conditioning substances. The Hairdreams care products specifically address this lack of natural conditioning and are formulated to meet the conditioning needs of human hair extensions. If used regularly, your Custom Crown will keep its optimal shine, elasticity and depth of color. I will inform you about the right combination of products for your individual hair type. Your stylist must record your product purchases in your file to ensure that you can take advantage of the Hairdreams quality guarantee for the complete wearing period.

Shine Care

Hairdreams pH Shine Spray is a special spray designed to moisturize the hair and neutralize the PH-level of the water still in the hair from washing. It allows the cuticle layer of your hair to close up, leaving your hair with a radiant and silky shine. Your hair feels strong as well as healthy.

Directions for Use:

- After the last rinse, spray Hairdreams pH Shine Spray onto the wet hair and briefly comb or brush through. Do not rinse.

Care for Lengths + Ends

Long hair needs extra care for lengths and ends. Improper hair care can lead to dry hair and split ends. Our high-quality Hairdreams Fluid conditions dry porous lengths and ends; if used regularly, it reliably prevents split ends.

Directions for use:

- Take a few drops of Hairdreams Fluid into your palms and spread it first into the ends and then into the lengths.
- Comb in thoroughly. Do not rinse.

Styling

After washing carefully towel-dry your hair without rubbing.

Roughdry your hair 80% of the way (meaning no tugging at the extensions with a round brush or comb, just use your hands/fingers) blow-dry first the bonding points, then your natural hair and hair piece.

Begin drying your hair either holding your piece with one hand or by placing a clip to hold your piece down and prevent tugging on your attachment points.

You can use a round brush and a small amount of tension to smooth your hair and the extension hair, the last few minutes of your blowdry. This is the best way to smooth down the cuticle of the hair and get a smooth and shiny finish is to blow it out this way.

If curling your extensions, run the extension hair through the curling iron to smooth the hair once or twice, before placing curls. This will give your extensions a more polished look, close the cuticle, and prolong the extension hair.

Styling Pointers

- ALWAYS use a medium to low heat setting with ALL tools, including your blow dryer and irons, on your hair!
- Be sure to use a Heat Protectant. This will extend the lifespan of your extensions and also keep your natural hair healthy.
- Remember, if you're planning on using a flat iron/curling iron, it's important to invest in good quality tools!
- Avoid these products, like the plague:
 - Moroccan/Argan Oil
 - Alcohol
 - Sulfates and Parabens
 - Avoid using products bought over the counter or available to you from places such as Drugstores or Hotels.

Sleeping

Brush your hair out thoroughly and then place in a loose bun on the top of your head or a braid or two to sleep. This will help prevent tangles/matting.

I also highly recommend a silk or satin pillowcase to prevent further friction and breakage

Swimming

Always protect your Hairdreams hair with pH Shine Spray or Fluid before swimming. Tie your hair or put it in a braid. After swimming, open the braid, carefully sort through it with your fingers, thoroughly brush out any tangles with your HairDreams brush, and dry the bonding points gently with a towel.

Try to keep your hair above water.

Shampoo and condition your hair as soon as possible after you finish swimming.

Fun & Beach

Use a hat or bandana to cover up your hair when you're out in the sun. This will prevent the sun from drying out your hair and fading the color, and also the sand out of your extensions.

Avoid sunscreens with Avobenzone or Oxybenzone, as these chemicals can oxidize in the hair and turn it pink.

The salt in the air can increase the changes of tangles, so pack your handy-dandy brush and enjoy!

Spa & Sauna

During spa or sauna visits, brush your hair out completely. Braid and wrap your hair in a cold damp microfiber towel.

Other Tips // Fun Facts

- After a few washes, the extension hair will expand and take on a more realistic hair texture.
- If you notice any excess tangling, or hair shedding, please contact your stylist, as these are quick fixes when addressed right away.
- You can live a normal, even active, lifestyle with your MicroLines Custom Crown! Just treat the extensions with some gentleness to keep them looking their best, the longest.
- If you are good to them, they will be good to you. The better you take care of your extensions, the longer your investment will last!

I hope you love your new MicroLines Custom Crown as much as we loved creating it for you!
And, of course, If you have any questions or concerns, at all, feel free to contact me!!
